<b>Office Action Summary</b>	<b>Application No.</b> 10/626,270	<b>Applicant(s)</b> YAMASHITA, SATOSHI	
	<b>Examiner</b> TAN X. DINH	<b>Art Unit</b> 2627	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1) The amendment filed 12/04/2006 is acknowledged. Claims 1-6 have been canceled.

2) The I.D.S filed 12/04/2006 has been considered by the Examiner. However, the Japan and/or foreign document(s), if they have not been written in English, are considered to the extent that could be understood from the English Abstract and the drawings.

Form PTO-1449 or PTO/SB/08 is(are) attached herein.

3) The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

4) (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5) Claim 7 is further rejected under 35 U.S.C. 102(e) as being anticipated by HORI et al ( 6,233,219 ).

HORI et al discloses an information recording medium provided with a plurality of long, narrow information storage stripes each of which records data, as claimed in claim 7, comprising:

a data region where the data are recorded ( Fig.1, data region 2 ); and

an identification region where edges of the information storage stripe are protruded and recessed along the width of the information storage stripe according to identification information which distinguishes the long, narrow information storage stripe from the other long, narrow information storage stripes ( Fig.1, address region 1 contains Disc ID information );

the identification further comprises a land identification section where an average position of the boundary between the land track and groove track is offset to the land track and a groove identification section where an average position of the boundary between the land track and groove track is offset to the groove track ( figure 13, land identification section 12, boundary region 127 and figure 14, groove identification section 11. See also the abstract for land identification section 12 and groove identification section 11 ).

6) Applicant's arguments filed 12/04/2006 have been fully considered but they are not persuasive.

Applicant states that “ Hori fails to disclose or suggest a land identification section where an averaged position of the boundary between the land track and the groove track is offset to the land track. Hori also fails to disclose or suggest a groove identification section where an averaged position of the boundary

between the land track and the groove track is offset to the groove track ". Applicant is directed to HORI's figure 13, land identification section 12 and figure 14, groove identification section 11, the indication of land identification section 12 and groove identification section 11 were also shown in the abstract, since section 12 is address information of the land and section 11 is address information of the groove, they are in fact land identification section and groove identification section. Further, the offset positions were shown in figures 13 and 14 as indicated above. For that reasons, claim 7 is still rejectable.

7) THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply

Art Unit: 2627

expire later than SIX MONTHS from the mailing date of this final action.
